---

here's my latest track. no elektrons on this one but spacy guitars+sherman (as stated before in the 'distort!' thread). tell me what you think!

sounds great! FUCK, i need to get a sherman! is the version 2 a down-grade in any way to the original filterbank? i could see the new one's patch area in the back being annoying... how many guitar layers is there? did you use an amp, or just straight up line in?

thanks :) in the 1st part there is one guitar layer, in the 2nd part there's a second added. guitar plugged straight into the sherman, no amp, sherman straight into my motu interface. added delay fx in Live.

i have a sherman v1. afai the v2 is the same with a couple of extra options. about the plugs on the front, they just released rack versions with connections on the front, check [www.sherman.be](http://www.sherman.be).
