HipHop, Breaks, Downtempo.... I don't know.
Just listen and relax to the new 6 track EP by Juno6.
Long reverbs, simple melodies and a lot of lfo's are waiting!

i really liked this stuff. nice ambient melodies and vibes. especially liked delete mausi - some nice broken programming. I soon forgot that you only used the three elektron units to write all this!

there is so much good music on this forum, its great.

The whole album is great.

Also his albums 'Soul static bureau' and 'Our memories of winter' released under his moniker Norken are great too.
