
Making a Left-only sample into mono on Octatrack?

Posted by KOTARE - 2013/04/22 22:02

Hi there - my friend has recently bought an Octatrack and I'm helping her troubleshoot some problems that she has.

Is there anyway, if she has recorded a stereo sample (A+B) but only had audio coming in one channel, that the Octatrack can make it stereo?

edit screen in the audio editor-->mix channels-->add l+r

in the future, just record A instead of AB for mono inputs.
