tIB - Rule of Four

_____

An EP that wasnt... mainly since I wasn't happy with the last part, couldn't fix it and lost interest.

Four modular jams with four modular systems: Buchla, Bugbrand, Blacet and Tinysizer, played live with no external sequencing help, stitched together in DAW and uploaded.

Comments welcome, thanks if you do and apologies for the really annoying repetitive sound in the last part that took me a few minutes to find and tame!
