
MD sysex file

Posted by 22tape - 2011/01/06 10:47

hey guys. just a heads up that i uploaded a sysex file of an all MDUWII track that i did quite a while ago. it's called on the range. i just wanted to double-check that it loads and sounds coherent, as i'm not 100% sure i uploaded the right sysex. if it doesn't work for you, just let me know and i'll upload the only other sysex i have for the MD.

:)

Just downloaded it to see if it worked. As far as I can tell the patterns all play fine and the three samples you've included are functional. (I saved them to ROM slots 1, 3 and 4 as their names apparently indicate I should do.)

Checking the patterns, it appears that you've got tracks that play samples numbered 1-9 (at least - maybe more), so I'm not sure if you deleted these, or they proved extraneous/unnecessary, etc.

Have you got an mp3 version I could check it against? Looked at your Soundcloud, couldn't find one but maybe I'm blind :huh:

In any case please post one if you do, cos even if I've only got part of it, this is a cool track and a real lesson in glitch and experimental hiphop. I think lots of MD UW owners could learn from it, especially if they had your original version handy for comparison.

Thanks for posting :backslap:

great, thanks for the response!

here's a link to the full track:

<http://dl.dropbox.com/u/7342434/on%20the%20range.mp3>

as i said, it's been about three years since i completed that track, and i had to sell the MDUWII long ago so i had no way to test to see if it was the right sysex. but i only made one track with the MD-- 2 different drafts. and i only have two sysex files so i'm hoping the one i uploaded was the finished draft.

really glad you enjoyed!
