
can\'t change password

Posted by droolmaster0 - 2011/02/17 23:57

Forum didn't recognize my username and password. got new password emailed and successfully logged in. When I try to change it, I get

Fatal error: Using \$this when not in object context in /home/elektron/public_html/includes/version.php on line 66

=====

Hi,

I want to change my password and tried Chrome, Firefox and IE without luck. This is the error message:

Fatal error: Using \$this when not in object context in /home/elektron/public_html/includes/version.php on line 66

What to do now?

Thanks.
