
Minimal Lead

Posted by lne - 2011/05/31 06:48

Hi there,

I am trying to reproduce a sound on the monomachine and as i cant get it right i decided to post it here to check if any of you guys know how to reproduce it. :)

Its like a drum lead that start at 1:42, first sounding with a high decay and then get really tinny... like a "glass" sound...

Can be heard here: http://www.youtube.com/watch?v=HIMYsEiMaAU&feature=player_detailpage#t=102s

Thanks

I am getting there... using sine wave with many tweaks on delay, filter and lfo... the decay idea is being controlled by the delay feedback.... not matching 100% the source but i think i found a way to get there.....

Oh man.... you are right... i spent so many time on the monomachine, trying to make that sound... only because i saw him touching the MnM right before the sound... and i didnt realize that the sound could be coming from the MD...
hehehe

Welll... at least i leraned a lot on the monomachine... ehehe

Thank you a lot

If you don't have a MD the BBOX Machine on the MnM should have a Clav to, don't know the right ocatave but it should be somewhere ;-)
