I am trying to message any one of the mods but for some reason I get "Your message couldn't be sent" I don't know if this is global or just mods? (don't want to bother anyone with a test message)

are you trying to message one person at a time? I think that trying to message multiple people at once never works and the message never gets delivered.

if messaing one of us at a time does not work, and your issue is important, email me at 12bitlibrarian AT giggymail DOT com (gmail)

I was just trying to PM Tib to tell him my button monkey thread can be deleted, but the PM gives an error and "tib" does not appear in the address list. I also tried to PM Nils a week or so ago (nothing important) and it failed too. He is also no longer in the list... Just FYI.
