Cannot send PM\'s
Posted by Indigo333 - 2011/08/19 09:26

Greetings,
I have been trying to send a PM to one of the Mods here and every time I hit the send message button, it states that I cannot send. I have under the character limit and the right name...not sure what to do? Thanks...Indi

Not sure what the reason for the PM fail is, but here's a temporary solution:

To contact any of the mods, use the following email address:

elektronusers@gmail.com

Use the subject line to indicate who the email is for. All mods can access this email.

Best,
Nils

I was actually looking to talk with you about the OT. I am looking at buying one and although it may complicate my life until I get to know it inside and out, I was wondering about some of it's functions. Peace...Eddy
