## Octa button monkey question

Posted by Veets - 2011/10/04 02:48

---

Hi all - I started up a new Octa project and the crossfader does not have the values 01-09 on the screen. Instead it has the values 01-01. Anybody know anything about this? My other projects are 01-09. I checked the manual for a solution and didn't find anything there either. Couldn't get anything on a quick forum search either.

you're fading between the same scene- hold the right crossfader button and press 9.

(I'm so terrible with the correct OT terminology!)
