## Elektron Users event - London

Posted by DTMT - 2011/12/16 00:28

---

Home of the Brave  
Thursday 26th January 2012  
Jetlag Lounge  
125 Cleveland Street  
London W1T 6DF

Iâ€™m very happy to say we have some amazing Elektron artists performing LIVE:

Dataline  
Stephane Lefrancois (Secret Music)  
Space F!ght  
Vile Electrodes  
Future Image  
Light and Shadow  
Sleeper Service  
The Beat Hub Soundsystem

Come and check out some of the forumâ€™s finest in action and meet other forum members! We're planning to have a large projector set up on the night showing the boxes in actionâ€

We're not looking for any profit out of this, but there will be a Â£5.00 cover charge that will be used to cover costs on the night â€” most of this should go straight to the performers to help with transport costs.

Having said that, anyone from the forum will only be charged Â£3.00 â€” please register your name with me first via a PM.

We might get a banner up on the site advertising this event at some point, but in the mean time please spread the word to any and all!

Toby

Some great news for those planning to come along...

As just posted, Space F!ghters have been added to the lineup. A live three-piece based around the electronic wizardry of Koshimazaki. I'm stoked, you should be too! To wet your appetites:

<http://vimeo.com/30541163>

Although the event officially finishes at 1.00am, the venue is licensed until 3.00am and we are welcome to stick around a bit longer... so it now seems an additional after hours Dataline vs Koshimazaki Elektron session might be on the cards.

Two weeks to go...

Hey guys... two days to go!

Yes, performers are on from 8.00pm until around 1.30am, and we'll record as much of the show as possible... so hopefully at least some good audio and video will be available for those who can't make it!

well done Toby,

I had a great time. Didn't get a chance to catch up with duncan, amanita, finlay and probably others but really good to meet the ones I did. Great that so many were there.

It was a bit odd meeting people from the forum cos it's like you think you should know people but you really don't. I forgot who was who very easily but once I'd had a beer (good german lager) everything was cool.

Great sets from tenchi, bongsau (surprise drum and bass on the forum) and finlay (liking those dancehall beats). had to leave to get the last train.

It was an inspiring event and well worth the train journey, I really want to step up and play a set should something similar happen again.

First a big big shout out to Toby who did a grand job organising the event

Great sets from all:

Bongsau - some great DnB

Future Image - Genre/beats mash ups very well executed

Vile Electrodes - Analogue Pop

---

Secret Music - extremely slick Techno/House, party on dude!

Dataline - Great stuff as usual

Space Fight - Experimental Future Jazz

I wanted to record audio of the night but the PA was so hot that the signal to the recorder was extremely low so had to abandon the idea. I hope somebody got the chance to record something.  
It was very good to meet so many of you from the forum, but unfortunately couldn't catch up with everybody who turned up, maybe next time

Here's hoping that we can do it again

how cool would it be to have an online Elektron application that essentially allowed users to log in, have their webcam streamed direct (via the application 'server', like a Cloud application or something) to a "client" version of the app running on a computer at the venue...

and all the webcams of all the Elektron users who are watching then show their reactions and encouragements, patchworked onto the main screen at the actual venue...

and also live streaming of video of the event showing on all the computers of the international users..

Hey all...

Its been a chaotic few days at work, so I've been a bit buried since we had the Elektron event. Haven't had a chance yet to say a massive thanks to everyone who performed and everyone who came along - it was a truly amazing night with some of the best live music I've seen in a long time... to be honest I felt humbled to be in the company of such talent.

---

Given the positive feedback on the night I'm definitely going to look at repeating the event... I learned a lot from this one, and there are a few things that I'll do differently next time round to make it better!

I think an event in the spring might be the next target... maybe April or May. It would be good to do the next one on a weekend and start a bit earlier in that day as well.

In the mean time I'll try and collate video and audio from the show in one place.

Toby
