## MD startup problem

Posted by Nils - 2012/01/01 15:37

---

From user XSIX:

Hi my SPS-1UW wont start since 2days a go, when i power on the device it shows 1.63 and after 2, 3 mins the display shows "PREP SAMPLES (128/128)" and then nothing,whats with this device? I cant figure it out,the support doesn't respond. any would be greatly appreciated ideas?

Guess the support department also wants to celebrate new year like everybody else....what do you expect....?

Still this problem sounds like you have to get into contact with Elektron as this will likely be a hardware issue.

I've sent email before the holidays ,it just hangs at the 1.63 screen showing the elektron logo and nothing more.

i have the same problem. here i was buying some 'quality gear'. now i have nothing.  
no warrenty

it seems to do with overheating. i know this is an old thread. but the situation is here and now :(
