Bug when trying to change profile details
Posted by sqr_face - 2012/01/16 11:21

_____

I clicked forum profile in the right corner, then edit details.
When I put in my correct verify password and want to change my user name, I get this error
Fatal error: Using $this when not in object context in /home/elektron/public_html/includes/version.php on line 66

_____

I've had this happen several times - not exactly sure why it occurs, but either keep trying (it does occasionally just work out of the blue), or try another browser. Try deleting cookies and all that usual crap you have to do.
