
Complex Time Signatures

Posted by nokill - 2011/03/31 15:22

Hi everybody,

i really like complex time signatures e.g. 5/4, 7/8, 15/8.
But I can't program them in my hardware sequencer (read MDUW).

So can you give me a hint, how to do this?

=====

Re:Complex Time Signatures

Posted by peлектor - 2011/03/31 17:52

Hold Function, press scale setup, and choose how many 16th-notes you want the bar to consist of..
5/4, you need 20.. (this means the track bars should be lit up to include the first four of page two, rest should not light up..)
7/8, you need 14, 15/8 you need 30..

:)

It's in the manual at page 38..;)

Re:Complex Time Signatures

Posted by nokill - 2011/03/31 18:37

I read the manual, but i can't remember this section.
Probably I should read it again. ;p

thank you.

Edit: After reread the pages and realize, that i've read them, there is a "new" question...
When I set 20 for a 5/4, it will result in 20/20 in the MD so I get a 5/5 Beat? Now I'm even more confused....side:

=====

Re:Complex Time Signatures

Posted by peлектor - 2011/03/31 19:52

Yes, it's a bit confusing. However, what you get is a pattern consisting of 20 16th's notes, and you can choose whatever you want to call that :laugh:

Still, the layout of the MD makes it more of a 5/4, because of the highlighted quarternotes on the trig-buttons..
:)

You can also edit the pattern length in song-mode, making any pattern you have playing however many 16th-notes you want at any time (takes some editing, but works nice..)

This is very nice if you want different time-signatures in one piece..

What would be even greater, was if it were possible to have different lengths in different tracks!.. As requested by many

in the want-list-thread..

:woohoo:

Guess that's too much coding to implement for the Elektron-guys..

If you set a pattern to be 20 'steps' (1 step = one 16th note) long, you're operating in a 'scale' of 20/32. If you wanted 7/8, you'd set the scale to 14/16.

The important number here is the numerator, don't get confused by the denominator value.

Re:Complex Time Signatures

Posted by FLEATINGMD - 2011/03/31 22:25

can anyone post their favorite tracks in odd time signatures?

i use them but only as a poly-rhythm - most of the song in 4/4 and a few bits in an odd time signature. i don't think i've heard (or at least recognized) modern music in odd time signatures.

interested to hear some!

Re:Complex Time Signatures

<http://www.youtube.com/watch?v=8qt2WbfotkU>

4/4 -> 6/8 -> 4/4

not that 6/8 is super-complex, but the way they transition is really slick.

Re:Complex Time Signatures

Posted by hageir - 2011/08/05 22:05

I've thought about creating overlays for this (one for 3/4 or 12-step 5/4, 6/4 7/4, etc. maybe one with all? -Different colors?)

It would give you a clear view of what you're doing when you're working with other signatures..

Like the swing for example, try it with 5/4 or even 7/4, it gets a bit confusing (you just have to count, really).

snd and mark fell are great for stuff that shifts or straight up ignores time signatures, esp. fell's latest 2 solo albums... really wanted to find track 2 of this on youtube, that boomkat preview doesn't go long enough:

<http://boomkat.com/downloads/365147-mark-fell-ul8>

also, been forever since I've listened, but the orb's track o.o.b.e. had a really fuckin weird polyrhythm. In the live bootlegs it's more clearly in 3/4.

too lazy to figure out what is happening in this om unit track, 5/8?

<http://www.youtube.com/watch?v=X5ZkKikink8>

=====

Re:Complex Time Signatures

Posted by TOS - 2011/10/16 10:16

^^ Superb tune that Om Unit one. I'd call it 2/4, with the hi-hats and arpeggiator splicing each beat in 5 sixteenths.

<http://www.youtube.com/watch?v=f7JiCZvJh5Q&feature=related>

BT - Dynamic Symmetry. I think its 9/8 or something but i'm not that good at diagnosing these things. The section at around 7.00 is a very obvious useage. Good vid too if you can be bothered to sit it out.....

Re:Complex Time Signatures

Posted by Amanita - 2011/10/16 16:01

Genesis also used varying time signatures in Turn It On - which was very commercial and fooled alot of school disco dance floors.

Does the machinedrum have different pre-scales like a tr-808 ?

=====

Re:Complex Time Signatures

Posted by TOS - 2011/10/26 03:46

Amanita, yeah - let's call it 9/4 for clarity.

Goomba, yeah, it's got the tempo multiplier for 1x, 2x, 3/2x and 3/4x.

American Men - Cool World

Epic epic track. Beginning theme is in 4/4, but grouped into 7/4 + 9/4.

You can get some extremly complex time signiture in song mode.

It takes a bit of time and preperation but I just love using the mono's bbox. Set up some 'chords' (not the annoying whistle or cowbell) and use the arpeggio's set the speed to whatever you what. Then set up a second, or several. You

can come up with some fantastic polyrythms. If you have a stedy kick on the MD. You can get away with some wacky stuff and keep it dance friendly.

You can also get some nice off time retrigs. It's limitless.

Hi guys can a complex audio signature be made using fruity loops?

=====

Re:Complex Time Signatures

Posted by hageir - 2012/03/01 00:40

One thing on my to-do-list is to design a little overlay (for swing)
that you can put on top of the steps, so you can get a clear view of where the first beat of a bar is (VERY CONFUSING when working in 5/3, 3/4, etc.)

The swing is a really, really important factor, especially in 12-step (3/4).
Every 2 step of 3 should be swung 70+% for a really nice rhythm.
But it gets confusing when you have to edit the swing for all the tracks.

=====

Re:Complex Time Signatures

Posted by zfigz - 2012/03/01 01:40

What do you mean by "every 2 step of 3 should be swung 70+%?"

Do you mean the 2nd step of every third bar?

=====

My god, that would be amazing! I agree, I find myself going cross-eyed looking at the steps when in odd times.

Sorry for being vague:

In 3/4:

It would be (X = normal S = swung)

XSX | XSX | XSX et cetera.

Or:

SXX | SXX | SXX

but as soon as you work in that 3 step signature it's easy to get lost because of the physical graphics on the Machinedrum/MnM (1, 2, 3, 4, 5 - 16 = locked to 4/4)

That's why I need to find some time and do this thing so we can all print it out and mark it with swing, the first hit of each beat, etc. :silly:
