
OT Structure Overview

Posted by Didjeko - 2012/04/19 01:45

I work hard on the Octatrack and the documentation. I tried to make a document showing the structure of the machine better (I hope so) than the one of the documentation, and with referendes to the pages of the doc for the different parts of the machine.

I would like to have your returns on this work for corrections / errors I could have make / improvements.

The document is a pdf. Here is a link to download it :

<http://dl.free.fr/hMk2B7Zqp>

It is an A4 document, but I set the margins so that, it can be cut to fit in one page in the manual.

The recaptcha doesn't seem to be working on the page so it's not possible to download the file... unless I'm missing something.

Thanks, Didjeko. I find your approach to diagramming the structure easier to understand the one in the manual. I think I'll stick it up on my wall until it all sinks in!

I sent it to you. I tried to upload the pdf here, on this site, but I gave up because it didn't work well. Maybe also, some Acrobat readers could have problems with a pdf generated with Scribus ? I wonder.

Thanks Watson.

I did the same on my google account (never used it for that before)
