Hey there Elektron fam, just released my new album We Flyin'. If you place a pre-order for the Cassette, you will get the digital version immediately, or just cop the digital version if that more your style. Tapes will ship in under two weeks. It's a lot of OP-1 and Biscuit with some Octatrack fun in there as well:) Thanks for your support! -V-F!

Wow, terrific work! Great oldskool vibe. Listening now, really digging it!

Did you use any other gear, or is it totally OP-1 Biscuit and OT?

@dubaholic, only other things I used were and SP-303 for Vinyl Sim and some mastering plugs in Ableton.

@Dataline Ah the master himself! Thanks for the support fam, make sure to have another look, I posted a few tracks from the album to soundcloud some days ago, but the WHOLE album just got put up on band camp last night, so be sure to have a listen to all the new jams!

Thanks!-V-F!

Sweet! Loving your stuff on soundcloud, every time I listen to one of your tunes it's like falling down a staircase made of treacle'n'funk.
