Congrats Oliver! Smooth housey grooves, I'd like a vinyl copy. Is there any chance you'll release this on Beatport?

If it's not top secret, I'd be curious to hear about how you recorded your trinity and what your post-production involved.

THX!

Beatport is not planned. I really like the Idea of making it NOT available everywhere on any time for everytime. I love to work with Hardware because it gives me limitation ;-)

It was the first time that i've recorded most Sounds on single Tracks into Ableton, added some Reverb and some little things here and there. Make some little adjustments to the Arrangement...It was really not so much like it sound ;-)

Now i have a better look of what was missing before, so now thinking about what i need to get the same out of my Hardware Set.

The downside on this was that i realized again boring it is to work "in the Box" ;-)

Thanks again for the nice words. And like i've said above, this would NOT be possible without you ALL! Or maybe some year's later...

and to honor this in the right way, i've put a thank you EU on the Record Cover too ;-)
