MD-SPS1 & MDUW \"Factory Presets\"

Posted by RubixGroove - 2012/08/22 03:53

Alright y'all, the way it's looking... I'll be the owner of a Machinedrum again more towards Fall/Winter this year. Not too sure if it's going to be a MDUW or non-UW. Either way, it's fine with me. I've owned both versions and I MUCH, MUCH prefer the factory sounds that come on the SPS-1 as opposed to the UW. Does anyone have these laying around? I didn't realize how awesome those sounds really are until I got rid of my SPS-1.

Please let me know if you'd be able to send those my way!

Appreciate it

BUMP

i'd also be interested in these.
Would love the person who posts a complete kits dump forever and ever.

I actually was never able to track 'em down. The kits that come with the SPS-1 MKII became such a huge part of my electronic soul that it almost feels like a shame to not AT LEAST have samples of 'em. :(

hmmmm... someone on this forum surely has access to a non-UW SPS-1?
though it would be a slight hassle, doing a backup etc. etc.
