
Mono Science Lab 02

Similar parameters to previous experiments. Use only FM -> DYN machines plus one effect of your choice to create bleeps, whups, swells, and wooshes. Ready, set, tweak!

Patience friend, Lab was only relaunched last week-end. Expect some severe aural treatment from enapa, EU's King of Mono FM, as usual I'll try to make something melodic/minimal, but I need to locate some spare time.

Expect some severe aural treatment from enapa, EU's King of Mono FM.

Also expect the unexpected, added some caribbean arcade-vibes to the usuall noise.... abit tweaks and some breaks and so...

knixigt, 6ch fm+ dyn... no efects... a limiter on the master.... plain no mustard...

.... plain no mustard...

hehe, just like a caribbean ricedish, soft and gentle at first, but then you start tasting the parts with hot habanero sauce which they forgot to mix :=)

I've just noted on Elektron's site there are 2 SFX-6 available again, I'm seriously considering adding it to my SFX-60 ...

Hey, i put the topping on just before serving....

A second mono is a good idea. on can be used in poly, i dont think i would use 12ch of mno, not when copy.etc is not linked to the second unit... but a poly or just use it to taste some timedrifting using different time.sign... as we all like...

easterskegg
crazy FM going on!
oh my!

Icelandic translation:

Easter-Beard :-D haha

Rightful bump.
Busy right now, but won't be able to upload before somewhere next week, nice machine to explore indeed.

Thanks, I was in Spain last week and actually my dad's flat is facing a bar called 'El Mono Loco', it does not have much success though and my conclusion was that they would if they had your enapa logo instead :=)

Really like what you've done Eminor#9. It's like some robot bossanova.

The lead melody sounds like its from incunabula.

I haven't had a chance to listen to everybody's yet, but I managed to make something:
HERE
No edits. No multitracking.
I really wanted to add a whole lot more, but I think I'll make another "real" version in due time.

Danke!

I have to confess that I haven't heard yours (or the others) yet. I have been playing with my new x0xB0x! When I stop playing with it (will I?), I promise to take a listen.

I'm sure everybody's submissions are as good as the tracks for the other Labs.
