Welcome URBANSPEACEMAN. I'm not sure of the content since it's in Italian, but it could very simply be a DVD of the tutorial videos on the Elektron.se web site. Save yourself \$20 and just go to the Elektron web site to view them.

Not that I know of, but if a chap named Dataline ever puts out a DVD on Elektron gear, I'll be first in line!

I'm actually surprised there aren't some 3rd party tutorials on MD, MnM, and OT.

Me too... some synth/machine even if they are very used are not covered by this type of video :-(
