Double Posting???

Posted by DaCaVa - 2013/01/12 20:17

Hey guys,

Everytime I post something from work, it ends up being posted twice. Do you have any idea why this may be the case? Is it because the operating system is old (Windows XP professional) also known as WinDOSE, or perhaps a stutter due to security protocols? Any ways sorry about the double postings.

L8r,

M.

Beside me such exactly was a vapour post on forum once. From what such occurs to understand it is difficult.
