
machinedrum ambience?

Posted by sleepassistant - 2011/06/15 13:50

have heard tons of machinedrum demos on youtube/sc and I still have never heard any one create any soundscape/ambient/"chill" tracks yet. am I missing something or is this something that is just not done? figured these would be the best fora to ask this in.

any earthling videos/audio bits this relaxing invader could check out?

Is the MnM sequencing itself or are you PLAYING it? Love the vibe though. Very deep. Reminded me of a weird drive I had once, driving from downtown San Antonio on a bunch of.... magical sugar cubes.... heading back out to the hill country, where I live. Transient, tranquil and very, very magical. :)
