
Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by watson - 2011/08/19 12:19

<http://youtu.be/4vksNjaBdGs>

The prototype is finally here!! It will fit both MkI and MkII units. in the future there will be a three machine version as well as some other products. Info will be made available on a website once the actual production unit is made.

had to edit this post for changes in production and cost.

UPDATE!!!!

we just got done with the elektron frames yesterday. here is the ghetto site i put together for ordering. there will be more pics and info up early next week when i have my camera back and some extra time.

<https://sites.google.com/site/companyofquail/home>

thank you very much for your interest

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by digital_steve - 2011/08/19 12:25

I'll take one of them!

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Indigo333 - 2011/08/19 12:54

I will also take one of them. These are tight and will they fit MM, MD and OT? I am looking forward to the 3 version model. I vote on WITH handle.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by anselmi - 2011/08/19 14:28

WOW! the handle locking system is awesome! great work!

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by dj_d_oz - 2011/08/19 14:53

Phoarr!! WANT!

What are the dimensions?

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by digital_steve - 2011/08/19 16:43

First reply on both threads about this

I GET MODEL 0001!!!!!!!

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by kirlian - 2011/08/19 16:51

damn! beautiful. that is definitely something i would buy. really nice work.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Bathrobe - 2011/08/19 17:05

Nice Work :-)

Is there a hole on the bottom for a stand? How do you get the machines in and out of the case? Though once in it, why would i want to get it out again ;)

How much does it weight?

It looks like the handle gives the case a bit of an angle on a table, which is nice.

I don't travel much on planes, so i don't mind the handle.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by cbm - 2011/08/19 17:37

This is lovely. I will probably pick one up, even though I only have a MD. I see an Octatrack in my future, once they add the dedicated loopers.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by dkcg - 2011/08/19 17:54

Very nice work! I would probably get one once they come out.

My vote is for whatever is sturdier. w/ or w/o handle.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by digital_steve - 2011/08/19 18:18

I still get the first one

Also I want the handle.

Fantastic design.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by previewlounge - 2011/08/19 19:53

simply gorgeous design work. it is like a treasure found in the fantasy realms of a computer game.. also interested to see the three-unit holder.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by futureimage - 2011/08/19 20:07

Wow that's even more amazing than I thought it would be - I definitely want one :) I have no preference over the handle or not - it seems worth the extra \$30 though.

Here's a question - I presume one EIT-1 can handle both Mk1 and Mk2 units simultaneously? For example I have a Mk1 Monomachine and a Mk2 Machinedrum; I'd have the Monomachine as the "base" of the stand as it's heavier and I prefer "playing" it flat. Would the EIT-1 accommodate this?

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Allerian - 2011/08/19 20:33

Sold. Exactly what I had hoped.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Daim - 2011/08/19 21:21

Sweet, I might get one too. Though I would prefer a matte or darker finish + some kind of fitted bag to protect it when carrying it around.

And please make sure it doesn't scratch our beloved units.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by xibalba - 2011/08/19 23:34

i would def buy one.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by binaural - 2011/08/20 00:00

Wow, that's very nice! It's the first time I read about your project. Wonder where the plugs go. Would be interested in a 3-model one too...

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by jdigital - 2011/08/20 00:11

would buy one with handle for my MD and OT B)

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by dubathonic - 2011/08/20 00:52

Prefer with handle...but either way, that's really gorgeous!

Could you post the dimensions of the case while closed? I just bought a Pelican case for travel, and I'd like to know if yours would fit inside it...I'd love to be able to just open the Pelican, set your rack on a table, plug in and go.

By the way, I don't have the first thread handy, so at the risk of an obvious issue that you've all but certainly addressed: I take it the Elektron units are secured with screws, and in such a way that the buttons won't touch one another? (ducks head quickly)

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by sovietpop - 2011/08/20 01:49

Awesome :woohoo:

I am curious about the 3 units model thought.

Great work !

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by watson - 2011/08/20 02:16

First off, thank you all for your compliments and helping me get this project going! The dimensions will be posted soon. this is more complex than it would seem because i am seriously debating making slimmer cheeks that fit only MkII boxes. in this arrangement you could order from me and say "watson I have 2 MkII machines and i would like a slimmer profile, can i have 2 MkII frames?" in this design choice you would also be able to mix and match if need be. i am still working out the economic ebb and flow of this, the last thing i want to do is increase the cost to my customers.

as it stands right now you can put an MkI or MkII in either the top or the bottom, it is deep enough and designed to work with both. i will post the dimensions of this unit later today in this thread.

I am going to thread the handle to be used with a mic stand next week and see how the balance is. unfortunately adding any more parts to it may go beyond the scope and price point of the project, although i will look at being able to offer a "stand upgrade price" if i can get it into the design.

also about the finish: i am looking into this, i would like to offer an anodized upgrade option. one thing to keep in mind: if there is anything you want specifically and you want to pay for it i can more than likely make it happen. i can do nearly anything custom for someone that wants it. this is merely our first commercial product in the synth market and we wanted to try and make something nice that would appeal to quite a few people so we could make quite a few of them and sell them at a reasonable price point.

if anyone would like to contact me directly i love talking on the phone with fellow synth people.

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Augment - 2011/08/20 02:52

I think the handle NEEDS to stay. The way it locks into place is the coolest part! Also, it looks like the handle is an essential part of how it balances itself and I'd hate to see that awesome design go to waste.

I don't think a \$30 difference will make or break anyone's decision.

Curious to know what the 3 unit "Trinity" version would look like. Would it be two flat and one angled, or would the bottom be flat, middle at a 45 degree angle, and the top one upright?

I don't even take mine out of the house much and I'd still probably buy one just because it's cool. :cheer:

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by nangu - 2011/08/20 04:22

Very cool! If you end up making both kinds, I'd prefer the slimmer MKII version.

I like the handle a lot more than I thought I would. I had been thinking that it would be more likely to fit in a Pelican case without a handle, but since this thing keeps the knobs protected the Pelican is overkill for me. It's not like I'm going to fly with it or anything. A skin of padded fabric with Velcro fasteners where the flaps close around the handles would be fine for my purposes- I can probably get there just by modifying a soft-sided cooler or a small duffel bag.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by tiB - 2011/08/20 04:47

congrats on realising a beautiful project. I look forward to seeing these with peoples machines in in the fanboy thread. :)

yes you would have no problem housing them that way. its actually designed so you can arrange any generation in either place and it will still stand up.

I am hoping for an anodizing upgrade option. still waiting on a quote back.

I will look into the bag option, I think this is a great idea. there should be something slick we can come up with that won't break the bank. maybe there is even an existing product that could be slightly modified. if anyone has any suggestions let me know.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Augment - 2011/08/20 16:22

I bought one of these amps a few months ago and the little bag/case it comes with seems to be the type of idea that would work for this. It's just an average soft padded bag with a cut out in top so the built in handle can be used. It also has the option for using a strap.

http://www.polglaze.com/images/Orange_TB_01.jpg

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by watson - 2011/08/20 16:36

this is a great idea because I could get some made to fit the cases and sell it as a separate product for little to no profit, that way the people that do not play live or travel would not have to bare the price increase. I will look into seeing how much these things cost. does it have any info on it that would help me in researching?

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by watson - 2011/08/20 17:04

a few new photos added so you can see the design my friend made for the end cheeks. it is really hard to get this to translate over in photography but this should give you an idea.

<https://picasaweb.google.com/116975451974063335185/ElektronCases>

also I would like everyone to know all the screws holding the elektron units to the truss will be the same. I was just experimenting with different screws right before I took these.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Augment - 2011/08/20 22:53

Unfortunately there isn't any manufacturer info on the bag and I can't find anything online that points me in the right direction.

Will there be a limit on how many go into production?

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by watson - 2011/08/24 06:03

dubgil wrote:

Will there be a limit on how many go into production?

I will continue to manufacture these as long as there is a demand great enough to keep them around. I would like to sell quite a few but also have some left in stock for future orders so that I can work on my other product ideas. I would say these will go into at least 2 manufacturing runs and when I run out I will make more. The difficulty here comes in when

you want to look at keeping the price down but not being sure you will sell them all. If I sold half as many as I made, no matter what the quantity is I would lose money on making them due to the manufacturing process and cost.

I could easily say "I am going to charge 400 dollars for these" and then not worry about making very many units while also widening my profit margin. But I would rather sell them for the best price I can so that more people can own them. Long story short(politics aside): I would rather make a little less money and sell more units. It is better for everyone in the end. The machine shop gets paid to run and the consumers get a better price on their quality product.

I will be announcing final pricing and availability once I get the final cost numbers after the first run. Also upon that announcement they will immediately be ready for purchase and be shipped swiftly to the customers. This is also another reason I am not taking pre orders. I would rather everyone just pay and then get the unit within a week after they send the money.

Also I do not want to cause alarm to any customers that can not afford them immediately. There will be more units available in the coming years. Please do not stress yourself falling under the guise that this will be a "limited" product. I do not see any reason, beyond a tornado or tragedy befalling the machine shop, that we will not keep these in production and have some extra units lying around.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by DTMT - 2011/08/24 06:35

Amazing work. I'll take one as soon as they're available, just tell me where to send payment.

After a failed attempt to construct something similar to hold both my machines, this seems like the perfect solution.

Thank you!

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by ipassenger - 2011/08/24 16:37

Really really want one of these, love the soft bag idea as well. Going to be a while before I have any cash for one, so I hope you can keep the production going for a while.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by rennweg - 2011/08/24 17:17

Wow, great work - fair price!

IÂ´d take one. Hope they will be available a little longer, because I canÂ´t buy one right now.

Maybe it has been asked. Do you ship to Europe?

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by audioblue - 2011/09/09 02:20

Ok make it two, my buddy would love number 69, yes ha ha, but someone has to have it, if not number 50 and for me number 13.

Thanks again, can't wait.

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by watson - 2011/09/12 05:24

Hey guys, just an update: I have been using prototype number 2 for a while now and it is great. we are finalizing a couple of things tonight and it will go into production this week. We already have the materials delivered so it is just a matter of a

machine getting free and us running the parts. I will post some pics of the manufacturing and assembly process.

I will launch an order website as soon as they are assembled and ready to go, that way they can go out in the mail within a couple of days after you have paid. Thank you for your patience and support.

I have a pretty big product announcement coming in about a month that I am very excited about, but lets get this frame in the field first before we start chatting about that B)

Remember, number 1 is mine!

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by Ozone - 2011/09/12 10:58

I'm assuming?? none of the units will be numbered, & its not like at this point they are rare, limited run 30yo analog mono synths, so I will be happy with one in any shape or form, as long as I can trust the carry handles... I dropped my mono machine on the weekend...luckily on carpet with no perceivable damage, but my first thought went to a case with handle.

Hey Watson...regarding the. bag, could you possibly give the dimensions of the case when closed with 2 mkII (or mk1 units) and I might try to source something out?

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

=====

Re:Ergonomic Interface Truss EIT-1 prototype - custom frame

Posted by watson - 2011/09/15 07:37

WENT INTO PRODUCTION TODAY! Should have all the parts ran by early next week and then its time for assembly. I hope to have the website up and start taking orders by next friday. I will not be taking orders before I have a bunch assembled and I can ship quickly and efficiently. This is a major step though and puts it in the "point of no return" zone. we ended up having to make a few changes that increased the price. We were going to get the legs laser cut but the guy backed out of the price he gave us and we ended up having to manufacture the legs ourselves. We also had to buy more material than expected. It looks like there will be between 25 and 50 american dollars added to the price. I won't know the exact figure until we have ran all the parts and I have paid for all the machine time. I will make my greatest efforts to get this to you at the cheapest markup I can afford. I sincerely apologize to everyone for "putting the cart before the horse" and giving you all a price based on something that I believed to be true. Next time I will wait until production run to give a price. lesson learned!

Besides this one moral dilemma this is a very exciting day for me and I want to thank all of you for your support and help in putting this together. On another positive note, I am beyond scratching the surface on the next product. I think it is going to be very nice, still working out the design but, it is getting near a point where I can have something to show to you all and get some more feedback.

=====

Looking good Watson... any idea on when they'll be ready?
Hopefully soon as the AU\$ seems to be sliding down a hill atm.

Here's a question for you, not sure if it's already been asked:
Will the EITs come with the mounting screws for each unit?

=====

yes they definitely will. each unit will come with 8 screws for mounting 2 machines. :koolaid:

We were going to get the legs laser cut but the guy backed out of the price he gave us and we ended up having to manufacture the legs ourselves.

What kind of legs can we look out for? But i can be patient until the website is up.
Thanks for your work :cheer: :backslap:

they will be the same as the legs in the video. we machined them for the prototype out of aluminum but had planned on

getting them laser cut out of stainless. unfortunately that did not work out.

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by watson - 2011/11/01 03:19

wow! it is so great to see this somewhere other than my place. grinning ear to ear right now. how do you like the angles? i spent a lot of time working on those. we even revised the final version of the case to accommodate a slightly steeper angle. also are you ok with the size? i heavily debated making a mk1 and mk2 version of the frame but this just seemed to be the most economical way to do it.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by cbm - 2011/11/01 03:26

I have very little time in on actually using it. Between trying to get some of my own stuff out the door, and getting ready for a host of ghouls tonight it was pretty much all I could do to get it assembled and admired.

I always found the reddish backlight LCD of the Machinedrum to be hard to read when the Machinedrum was laying flat, and it's quite easy in this frame.

More after I have a chance to use the system in days to come.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by watson - 2011/11/01 03:28

i also have put up a very simple assembly page.

<https://sites.google.com/site/companyofquail/assembly>

i am working on getting more photos and videos up in the near future.

YES! i am glad this worked. may i ask how tall you are. i am 5'6" and i tried to stand on a variety of risers to try and accommodate as many people as i could. i had the same problem with the MD flat... so the angle also solves this problem if you put the MD in the bottom part.

you pointing this out has made my day! thank you. :koolaid:

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by nangu - 2011/11/03 02:17

I took some pics of the locking mechanism- it couldn't be more bulletproof. I hadn't quite figured out how it was going to work until mine got here. The entire width of the handle slides in a channel and acts as a giant deadbolt.

Unlocked:

<http://i1222.photobucket.com/albums/dd483/crabtacular/unlocked.jpg>

Locked:

<http://i1222.photobucket.com/albums/dd483/crabtacular/locked.jpg>

It fits in a Pelican 1550 case perfectly- the lid closes easily, but it's a nice snug fit. There's plenty of room around the sides for more stuff:

<http://i1222.photobucket.com/albums/dd483/crabtacular/incase.jpg>

The feet of the EIT fit in the channels and rest against the crossribs on the lid, so it basically centers itself if you want to use the case as a riser. If this wasn't planned, it's pretty amazing luck:

<http://i1222.photobucket.com/albums/dd483/crabtacular/side.jpg>

Here it is from the front:

<http://i1222.photobucket.com/albums/dd483/crabtacular/front.jpg>

Thanks Watson!!

Oops- the pics didn't embed so well. Here's a link to my Photobucket album if you'd rather see them there:

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by Ozone - 2011/12/01 07:00

@ EXUVIAE: The product is called "Magma Digi Trolley II" ... it comes in a few different flavours & appears to be available worldwide according to google.

<http://www.djcity.com.au/cases-bags/equipment-bags/47605-magma-digi-trolley-le-bpitch-control-edition/2331> was the version I bought, as I wanted the extra waterproof option.

There is also a plain black version (47600)

<http://www.djcity.com.au/cases-bags/equipment-bags/47600-magma-digi-trolley-ii-black-black/2329>

& one with red interior (47604)

<http://www.djcity.com.au/cases-bags/equipment-bags/47604-magma-digi-trolley-ii-black-red/2330>

I have just enough room in the bag for a netbook, NI AK1 soundcard, power leads & cables, though there is the front pocket also. Seems well made but time will tell.

Cheers

Hey Joshua I think your referring to the Magma bag? if so I wouldn't use as a table base for the eit-1 as its not designed for 5-7kg + human pressure on top. For that purpose the pelican case would be much better. I'll be testing its sturdiness though as I am off to NZ after xmas for a while.

Also do you have many frames left? considering getting another in early feb.

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by Ozone - 2012/01/18 09:02

Got a query regarding the EIT-1 with a possible modification.

I have been looking at this image...

http://farm5.static.flickr.com/4110/5205847447_1f74912609.jpg

and developed a thought regarding the EIT-1.

If the handle could be made twice(?) as long, the EIT could possibly be modified to hold 4 Elektron machines.

I am intrigued how the two Elektron machines were joined together in the above picture though. Anyone any ideas?

i am going to assume there are some bars or a panel running along the back of the units?

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by RonF - 2012/01/26 09:05

I just got mine and its just absolutely amazing. REALLY high quality, and very ergonomic. The angles are just right, and the build quality is very high. Visually just stunning.

No there are no bars or panels along the backs of the units. The units themselves integrate with the "cheeks", and then the heavy machined handle runs along the back of the entire assembly. The result is a fully integrated "system"....reminds me of my euro modular system case. What was once many modules, becomes one integrated "system". The whole is greater than the sum of its parts! Its really nice!

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Thanks for that info Olle, I will do just that.

I wish it was as easy as gravity, friction & rack screws, but seriously how would you manage to screw 2 Elektrons together at the rack mounting points where they sit so flush together, & then undo them? Maybe you are right Watson.... a hidden panel behind/below the units, or super glue.

EDIT: @RONF: I was referring to the pic I posted on the previous page. Can also confirm the build quality, practicality &

style of the EIT-1 personally.

Screws on each end with some sort of pannel along the bottom and back. And gravity. Would be hilarious if the guy used super glue.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by Ozone - 2012/03/19 12:19

Cheers Play records... Yeah the glue seemed at least as humorously possible as 'friction', though I do remember seeing an electric guitar with metalzone pedal superglued glued to the body at a pawn shop yrs ago.

Yeah JD I think you could be onto something there.
Means the OT warranties would be voided though.

The reason I held off (besides not knowing a local skilled metal worker/machinist to make a longer handle) is also the size/weight issues. Would be easier travelling to split up 4 elektron machines... ie. 2 on carry on & 2 in check-in luggage, so it looks like another EIT-1 is on the horizon. B)

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by NWAQ - 2012/04/04 19:49

Just bought the frame off someone, but it seems the sidescrews and wrenches are missing. Anyone have some measurements of some sort of these so i can get them from a local hardwarestore? Length and thickness of the screws

would be most important i guess...

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by MrSysex - 2012/05/02 03:41

Does anybody have a good suggestion for a case to put this in?
I'm going to hit up some thrift stores to see if there's a suitcase it'll fit snugly in.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by sombunall - 2012/09/05 14:48

Hey nangu - Do you think a third Elektron with one of the plastic covers would also fit on the side in the Pelican 1550 case along with the EIT-1? Could the 1550 possible carry the entire trinity?

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by nangu - 2012/09/05 16:20

It'd be really tight. Maybe with a mkII, but that sure wouldn't leave much room for padding. I'll get measurements tomorrow- I don't have the Pelican here right now.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by nangu - 2012/09/10 14:57

There's more room than I thought. With only the thin layer of foam at the bottom and none around the sides, there's slightly more than 1.5" of room between the knob tops on a third mkII unit and the EIT. After adding the plastic lid and some foam, it could probably work. I wouldn't ship it or fly with it using so little padding, but it should be fine if you're just carrying it around yourself..

<http://i1222.photobucket.com/albums/dd483/crabtacular/EITspace2.jpg>

<http://i1222.photobucket.com/albums/dd483/crabtacular/EITspace1.jpg>

Awesome thanks for posting such a detailed reponse. Very helpful!

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by nangu - 2012/09/10 16:05

One more thing- the Pelican's lid needs a little push to close properly with an Elektron in there sideways. I'm not sure whether that's good or bad. It might help to hold the third unit in place securely, or it might make the Elektron plastic lid more likely to pop off. I don't have an Elektron lid- I only tried one for a few minutes awhile back. The eggcrate-style foam in the Pelican's lid may eventually compress from using it like this. If it's a problem, you could always trim some of the foam away. Just thought I should mention it..

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by biologik - 2012/12/12 07:47

I bought my OT and MD an xmas present.

It came just in time for me to do my live PA in Toronto (Saturday Dec 15th @ Toika if anyone is around!).

Ain't she a beaut?!https://fbcdn-sphotos-a-a.akamaihd.net/hphotos-ak-ash3/537533_565022350179256_979822241_n.jpg

Thanks Watson! :)

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by biologik - 2012/12/17 03:00

I figured I would update this again. First off, the EIT-1 is just amazing. I love it!
Second, as noted, it DOES fit in a 5010 pelican pelican case. I took out the "big" layers of foam and only left the thin layer on the bottom. Also, the full foam padding is still in the top part of the case.

In this case I fit: all cables + several extra ones, all PSUs, all midi cables, the EIT-1 case holding the MD and OT (not taken out of the case as shown in a previous post), a virus snow and a little pack of padding to protect the virus knobs. With all the above the pelican is packed to the brim but everything feels VERY secure and safe. I could not fit the BCR2000 in the case so I threw it in the elektron bag (could not zip up since it is too tall).

I'll need one that holds all 4 elektrons and that fits snugly into a huge pelican case.. only drawback will be the \$2500 pricetag :p

jokes aside, this looks seriously nice!

Posted by Weston Underwood - 2012/12/17 05:20

I've got two, one for OT and MnM. The other with a MD and a little space waiting patiently for an A4. They are great and look lovely. The only slight problem I have is that they sit a little hi in front of my monitor which is a slight issue as I use logic for tracking. But you can't have everything.

Posted by Nightfuture - 2013/01/02 00:55

I ordered one of these about a week ago, but have not recieved any confirmation or any sign that someone have seen my order. However - the money has been drawn from my Paypal. I sent a mail, but have not gotten any answer. Should I worry?

No worries whatsoever, Watson is a standup cat and always comes through. The holiday are allot on everybody and it gets all cray cray. I have 2 of these trusses and need to order another one actually. They are as solid as he is, hang in for a few and he will get at ya. Congrats on the EIT, it's sleek as all get out. Peace, eddy

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by Nightfuture - 2013/01/11 04:27

I got an email from him over a week ago, where he stated that he would ship this past monday and i should receive a tracking nr, but i did not. I have since tried to contact him via mail, but have not heard anything - since I live in Norway it is pretty expensive to call and I understand he prefers to hear from customers on the phone?

Watson - if you read this; pleas check your mail :)

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by watson - 2013/01/18 06:59

sorry for the delays. all the units that can be shipped have been. i have had some problems with a few parts and had to get them re-milled. the next run(including the limited black anodized version) will be shipping in mid feb-early march depending when you order and what version you get.

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by lhatederekreed - 2013/03/08 21:06

As I await my eit1 I've become curious: is there enough clearance in the eit1 truss for pl1 plastic covers to be used? While it doesn't seem like the height would be an issue, I'm curious if the units being butted up to the truss sides, prevents the pl1s from locking into place around the edges.

Anybody else tried this?

Thanks.

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by Tarekith - 2013/03/08 22:56

If they ar emounted butted up on the ends, then the covers will not fit is my guess.

I have the plastic cover and sadly it will not fit with the EIT-1.
That being said, I had a dust cover made and am perfectly happy :)
I'd take the EIT-1 over the plastic cover any day!

Hey, so how do you think the A4 will do in one of these seeing as they have to have their venting kept open?

There are no issues with ventilation or heat... This came from elektrons mouth as well.:cheer:
I have mine in a truss and left in on for days as a test...all good:)

Eagerly awaiting mine too! For those who are already rocking one of these ... I read a few posts about carry bags. Was there a clear winner decided? I'd like to put the EIT in some kind of padded shoulder bag as I already have 2 pelican cases to carry.

Posted by lhatederekreed - 2013/04/03 06:11

Received this from Watson today in regards to the BLACK EIT-1:

"they look great i just got the end plates and legs today. i will post some pictures to the website this week. the handles did not show up yet but are on the way. i am not sure why they didnt get put in the same shipment but i am waiting on a call back from the anodizing plant. i will get back to you tomorrow when i have heard from them and i start contacting everyone."

Very excited to know its getting closer.

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by watson - 2013/04/03 06:24

hey patient users,

i want to apologize for the delay. i have had a few problems with the machine shop which i will not bore you or further anger myself with on here :dry:

i am still waiting on handles and some hardware fixes. but they assure me this will happen by the end of the week, i hope this is true. either way i wanted you all to know there is progress and i am not just slacking off.

the good news is the black frames look fantastic.

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by johunny - 2013/04/03 20:14

Looks great. will cover the A4 air vents though, not sure how big a problem that could be in the long run.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by lhatederekreed - 2013/04/04 00:52

A buddy of mine used small cardboard washers to create a gap on the ends, plus the bottom vents are uncovered. Apparently it is not an issue.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by watson - 2013/04/04 02:37

elektron told me as long as you do not cover the vents on the "bottom" as well you will be fine. this is why i did not make any that have vents in them.

=====

Re:Ergonomic Interface Truss EIT-1 custom frame AVAILABLE NOW

Posted by reset - 2013/04/04 03:01

Good, so I can take the cardboard washers out and just put some tape in there for paint protection. AND thanks Watson for sending Stephanie the EIT for xmas! B)
