as suggested on the forum. i had some free time so i put this together rather quickly.

http://maps.google.com/maps/ms?hl=en&ie=UTF8&msa=0&msid=201044798449108983254.0004a162d19c39301da11&ll=36.597889,-82.089844&spn=74.760371,158.027344&t=h&z=3

here you can edit the map to show where you are located. i hope we can get a lot of people to participate. there is also a youtube video in the description of the map that will show you how to do things. i will also post the tutorial below.

Sure, but my map lacks the 'toolbar', so I only can zoom in and out, place the streetview character. I'll figure out what I'm doing wrong tomorrow and let you know!

I also don't understand it. I actually tried to do it, but got it wrong. Now how do I delete my mistake? :S

EDIT: It does work on my studiocomputer! Must be a different version of firefox causing my issues..

Anywhoa, added mine!

Next stop the forest to hunt down Robbie for a drink! ;)

Firefox :(

it follows the web standards so tightly that it's incompatible with the internet ;-)

@ Caustic Crush

I clicked your marker to see where you're at, and I might have dragged it a little bit on accident. My bad homie.
