
Genius of Time vid

Posted by dubathonic - 2013/05/17 01:12

I don't think I've seen anyone post this performance here at EU ... someone shared it at livePA.

Live at the Boiler Room. Quite a few Elektrons including at least two OTs, think I saw two MnM's and an MD as well, plus lots of other hardware.

Sweeeeeet!

Sounds like some Elektron cowbell at 15:00 and thereabouts...

Nice find!

There's a real 909 in there too.

Edit: And a Juno 106

Edit: And an 808

Whole lot of live synth.

Thoroughly impressed. They nailed it, the crowd loved it and i'm officially a fan!

It was a very sweaty, smokey, packed out club in Melbourne full of 20 somethings.

Extremely tight grooves with catchy bass lines. So great to hear the 808 and 909 in a live setting. Everything sounded nice n loud n punchy.

They played exactly the same set as in the Boiler room video. Lots of well timed pattern switching, patch changing and improvised pattern/fills on the 2 octatracks, MNMs, MD, 808, 909 and the akai sampler?

I also see a few Elektron PL-1s. ;)

Great performance.
