---

yeah,  
last weeeekend i've recieved my octa. finally. it took my a long time but now its here. the trinity.  
got my hands on the ot every free minute. very deep structure even for a elektron user for 4 years. so much possibilities  
and new awesome stuff.  
still fiddling around whit my setup. not shure if i use the ot as master and fx machine or as a third instrument. i like to  
have seperate outs from severall instruments with direct control on the mixer to dub out my tracks.  
how do you guys use the octa?

Couldnt exactly decide how and where... solved it with a digital-mixer with extensive routing  
so its easy to "patch" what i want to get.. and yes, its lots of fun experimenting

what does what if you put whatever through something :) so have fun exploring your new toy  
i am sure it make ya smile..
