Does it ever! Love the stereo claps. Definitely on my gear radar.

I think this is going to be my new MD compliment. Need to give the 707 a break.

Yeah I really want to hear a well mixed demo to hear how it sits (vs. the overpowering JoMox DMs).

It's pricey, but I could sell my Airbase 99 easily and fund a good portion of this purchase so I'm very interested....

This has me very interested. I had not heard a line out demo before this, all have been video camera mics.

How to fund it? :dry:

Canceling my Volca trio preorder will get me 1/3 of the way there.

Has anyone picked one of these up yet?

I'd love to hear first hand accounts.
