a4 - sharing my kick , snare and clap
Posted by sixto - 2013/05/19 21:07

I hope you enjoy so much with these little 3 sounds i have created in the a4 , a kick , an snare and a clap . Here you have the video showing how they sounds :

http://www.youtube.com/watch?v=NNwFygQq2k8

ANd here you can download the kit , and the sounds :

http://www.mediafire.com/?ql7xc7vb22mznxu

Of course, could be improved , surely, but doesnt sounds bad !

improve then and share !

i like the snare! cheers

(btw you can mute/unmute tracks if you go to performance page and disable grid record mode, then use trigs 1-6 to mute... single-handed :))

heheh yes yes , i forgot the performance mode hehe . Thanks . The clap is really hard to do it , if you see i only use the noise . I will find more information about how do a good clap , of course that clap is a shit but will try to improve ;) clap 2.0 Snare not bad , i was looking in sylenth vst for a snare and i saw that the waveform is a sinewave , but a4 has not a sine wave so i use the triangle and add a low pass filter but its very hard for me design a sound , im a noob.

my A4 is away for repairs, so I can't play with your sounds, only watch the video...
but as a clap, I've made one which works quite okay I think.. check it out if you like: http://cl.ly/1N1a1T1r1536
(this is pulled from a backup.. there are 2 versions, they are pretty similar probably... try playing with the filter frequencies, the envelopes and LFO speed!)
