
SFX-JII and new project

Posted by guga - 2013/07/28 05:55

hi all,
i thought i would give a quick (summer/winter) update for those interested in the SFX-JII and a new MIDI controller i'm working on:
- the SFX-JII public beta will end on the 31st of august. the new model, which will have a new enclosure and a new board, should hopefully be available in the next few months
- the first prototype of the M4 (Morph 4) has come to life. here's a video of the prototype in action
feedback are (as usual) welcome

=====
