
Video *** Marc und Moritz Live @ HLUG2 Bayreuth

Posted by MK7 - 2013/07/28 21:22

Posted a video with footage of that gig on our website.

Tonight at 2:30 AM we performed our Rumpelstilzchen set live @ a GREAT small festival deep in the forrest! Relaxed people, nothing but nature around, large PA system, natural delay coming back from the trees, a small lake, campfire, barbecue, light show, a lot of DJ's, ground-shaking bass. woah B)

We recorded quite some video material, still have to cut it properly. No audio recording, because something went wrong on that side (beer.....), but the sound was very similar to our latest soundcloud post though: other thread.

What I learnt from the previous gig worked perfect: relax, have fun and just touch a button/knob here and there. people prefer a smooth, continuous sound so doing less is more.

Shame about the unsuccessful recording, the set on the other thread sounds nice!

Reminds me a bit of my only public performance so far, as nothing was recorded due to a computer fault.

I commented on YT, but I might as well comment on this site as well. This is wicked, I would love to be able to attend one of your gigs, your sound is so polished and professional for live PA. Wicked work guysB)

Absolutely brilliant guys... seriously great skills, but even moreso, great MUSIC, and that is a rare combo in Live PA. *respect!* -highsage (DetunD live artist)
