## Processing Doepfer Dark Energy

Posted by orangehexagon - 2013/08/01 10:13

---

I love my Dark Energy and I've been using the ableton effect unit "resonator" lately to process the audio from my Dark Energy with some great results.

Just curious to hear other what others use to process their Dark Energy (whether it be software or hardware). Any suggestions on beefing it up for bass lines?

I don't really use mine for bass much. Usually for higher squiggly stuff and I use it a lot an octave (or a 5th) above my Acidlab Bassline.

I have this pretty crazy effects chain I sometimes use on it that is 2 pitch shifters so it kind of makes it into a three note chord along with a leslie and phaser. Pretty crazy!
