
Octatrack Demo featuring the MS-20 Mini and Moog Minitaur

Posted by ml692787 - 2013/08/04 15:11

New Electronic Demo...Recorded one-take in Octatrack Arrangement Mode driving the MS-20 Mini and Moog Minitaur. MS-20 Mini being processed through the Strymon Mobius and BlueSky, the Minitaur being processed through the Strymon Timeline, everything mixed in the Octatrack and recorded straight into logic with light compressor and bounced :y)!!!

MyMidSummerDemo10

Enjoy!!!

Thanks! Yes this was live and i believe arranger mode is the equivalent of song mode from the other elektron devices, this song uses 16 patterns, with 4 midi tracks dedicated to the MS20mini and 4 midi tracks dedicated to the minitaur per pattern.

fantastic. very good performance . And those analogs are fucking amazing , that minotaur , o my god , and that ms20, what a gear setup you have. I only have the analog four and its very funny but i can't get out from my head and im seriously thinking in buy one . But don't know. Keep it up amazing work brother. amazing performance
