
My first Hardware track ever recorded.

Posted by Mihajlo - 2013/08/15 02:28

Just wanted to show you guys my track and see reactions.

P.S. All sounds made from scratch.

Analog Four used only... added some eq and compression after recording.

I like the synth sounds and lines, but I would change the slowly starting kick (which seems out of sync due to slow attack).

A bit messy/undefined at places, but I liked it nevertheless.

As a mild criticism, and I only listened to it at school with some crappy headphones, but at least with those the kick didn't sound that great. It wasn't superbad or anything, just a bit basic and lacked punch.
