---

played a really cool festival last night, had some fire spinners play during one of my sets, got a short video and thought I would share it :-)

Ill have another one in a few days, that was filmed inside of a grain elevator, we set up a microphone at the top of the silo, and did a direct recording from the board, two camera angles, so hopefully all that turned out good and I can post a nice video of it in a few days

in the meantime, FIRE!!!!

yep.. looks like fun!

TBH, the first view i din't even see the fire dancers. i was watching your hands.

Buffalo DJ scene, eh? You happen to know DJ/Producer, all around great dude Bill Boulden, aka Spruke? Good bud of mine.

If you know him, tell him his buddy Ryan from LA says what up. Ha.

Nice setup/music, unfortunately the crowd is just standing around watching those dancers..

That was cool! I enjoyed the video you posted at VSE of the sound check, too. Would love that cavernous reverb myself!

Thanks guys, I actually did a set later on in the night after this one, inside of one of the grain elevators, i did a multicamera shot of that and recorded a mic at the top of the silo, and a direct feed, so that ones going to take a bit to edit, but heres the test I did with just the tempest inside the solo, crazy reverb!!!!

That's the one! Almost made me wish I hadn't sold my Tempest.

Really enjoyed both of these I must say - great stuff - the reverb in that silo is insane to say the least.

The Tempest in the Grain Elevator looked like a lot of fun â€” one big dedicated outboard reverb unit . . . set and forget.

Thanks!

Yeah, it was really cool recording in there, im trying to schedule a time to go back there with some more mics, drums, and my serge system :-)

hey n3wt!

didn't know we had another elektronaut so close! :D

i live in southern ontario near a few other elektronauts.

good to know you're in the area.

i LIKED your facebook page, so i'll keep in touch.

peace

johnathon doe aka Derek Irwin
