
The Evil Eye projects

Posted by Ether - 2013/08/22 03:15

Hi all,

I've recently started a recording label on the web called Evil Eye. It's a label that will contain a lot of different musical projects, including heavily featuring my Machinedrum n' Bass two-piece band, Ether.

I have made a commitment to updating this site every week with new tracks and videos. So you should see a lot of new music from Ether in the near future.

Here is a link to our latest video, from last week:

Ether is a project I started while living in South Korea more than three years ago. It's transformed a lot over this time and has grown to include a strong focus on visual accompaniment. The music is improvised using a Machinedrum and electric bass/looping. Currently we are based in Berlin. You can see a part of our last show on Saturday here, in this week's video:
