
OT+A4+MD+Minitaur and summer festival inspiration ;)

Posted by noxical - 2013/08/22 03:23

Posting my first production set without using a computer. Feeling fresh and clean with my new gear after some serious studies and research of manuals and so on, and off-course all the help from the people in this forum (thanks so much).

Set-up:

Minitaur is routed to the MD audio-in and controlled using both CV from the A4 (for filters) and midi from OT (for notes).

Both MD and A4 are routed to the 4 Octatrack audio inputs.

Some ducking effect on the A4 using thru machine.

Octatrack main out is recorded directly using Reloop mp3 tape recorder.

No final mastering is done.
