
DaCaVa: Another MDUW + A4 Acid Piece

Posted by DaCaVa - 2013/08/22 10:25

This track is utilizing one of the layered kits I came up with utilizing Moritz's 909 inspired template. This isn't perfect, but it has it's moments.

There is no post processing, just the stereo out of the A4 & MDUW into garageband. Since I made a 128 KBPS MP3 version, there are some artifacts that shouldn't be there, as well, you can't really hear the ride & RS pitch bending.

I had fun recording this.

Cheers:)
