MDUW + A4 - Experimental Acid (unpolished)
Posted by DaCaVa - 2013/08/24 12:52
_____

Title says it all... I'm working through various A4 macros for making an acid battle station. I'm making some headway, but it requires further evolution.

Cheers:)

Very well done, I like how you have kept the A4 parameter ranges similar to a 303, enjoyed!

Thank you Daren... I just don't have a good solution for the note slide yet. It sounds okay for 1 step slides, but when you need to do an octave slide over 4 steps, I can't really get there. The only sort of solution I found is parameter locking the TUN on both steps, and then using a parameter slide. It's sort of a crude solution, but it approximates the effect. Cheers:)

Yeah, it is a shame the A4 slide is fuxored, I really hope that Elektron will sort it out. But your trick seems to work well in the meantime :)
