## TrondC/Oobleck - quick recording, opinions?

Posted by TrondC - 2013/08/24 21:05

---

Hi folks, I've been very quiet over here with my music lately. My laptop died and is sent to repairs, meanwhile I've been going ever deeper into the A4 and have arrived at some pretty nasty places with it. Here is a quick recording, just a live take recorded with my zoom recorder and headset, so some levels are way off (kick too low, reverb too loud etc). Machinedrum does the 909 hats and the crash cymbals, both elektrons are also going into the sherman via aux send, Sherman ADSR is triggered by the A4 cv out.

Techno

Awesome stuff Trond. I would make an absolute ass of myself on the dance-floor if this was playing:)

Proper techno! Nothing wrong with the levels imo.
