
Novation Nova in Mint Condition w/ OS4.1 reasonable price ?

Posted by VennDiagram - 2013/08/24 21:47

Just wanted to check with people here.

I have a Novation Nova with OS 4.1.

It essentially looks like it did the day it was purchased, has original manual (in great condition), all the original packaging, psu and rack mount kit.

It is essentially the same synth engine as a Supernova (with OS 4.1) with 16 voices and 6 Multi- Parts.

Someone offered me \$250 for it on CL which I personally think is way to cheap.

Mini Nova's aren't even Multi-Timbral and sell for more,

Honest opinion here on what you think a mint Nova Desktop is worth because \$250 is a whole lot of stupidly cheap for that much synth.

Comments / thoughts / opinions ?
