what do you guys think would compliment the a4 better? the jomox mbase or the mbrane? I've been itching to get my hands on a jomox for a while and now i really want one so i can control it via the cv and run it through the input of the a4. what do you think?

Mbase, it's much harder to get a big Phatt kick out of the a4 ,

I use the MBASE with my A4. You just can't beat the MBASE for deep thumping kick drums. BOOOOM.
