
Octatrack Midi sync Swing?

Posted by rockreid - 2013/08/29 03:56

Can the Octatrack send a Midi clock that Swings? I want to use my Frostwave Quad CV to send DIN sync to my Modular and it uses a Midi In. I know there are some DIY kits that will add swing to a DIN signal but I don't know if Octatrack can add Swing by itself to its Midi clock Out.
