## Quick Question about voltages between America and Europe.

Posted by SuperCollider - 2013/08/29 22:55

---

If I buy an Elektron product new from an American seller on ebay will it not work in Europe?

Cheers.

Elektron power supplies are universal i.e. work on 100V to 240V AC

<http://www.elektron.se/content/power-supply-mdmm-mkii-and-octatrack-compatible>

You just need to buy the part that plugs into the wall (and into the adapter)

Like this (if you're in the UK):

<http://www.ebay.co.uk/bhp/radio-power-lead>
