
OT - Multiply on Pickup?

Posted by sicijk - 2013/08/30 20:14

Who experienced a MULTIPLY happening on Pickup when pressing TRACK+MIDI ?

What does it mean?

On the manual only this is reported:

11. Pressing the button activates the MIDI sequencer mode. A lit LED indicates the MIDI sequencer is active. When in the RECORD SETUP menu this LED indicates both the signal strength of the internal sample source and the internal source selection for recorder trigs. + opens the PARTS menu. When a Pickup machine is used, the button combination performs a multiply command.
