
FS: Jomox Xbase 888

Posted by skylab001 - 2013/08/31 00:28

I've got to make some space so some things have to go, I really do like this machine but I'm just not using it as much anymore. It is seriously in MINT condition. The plastic film is still on the LCD. It works perfectly, has the latest OS installed, and PSU. I have the original paper manual too. It's never left my home studio. \$1250

Los Angeles/Southern California area if that helps. I thought I had put that in the post.
