
OT invisible sets

Posted by GiuseppeMagnatti - 2013/08/31 01:19

I don't know if somebody had the same issue but I bought 3 sample packs like caught on tape, yard sale gear & cult of SP1200...

The problem is that between these 3 the only set that I can see is (caught on tape)

In the file manager I can see all of them, but in the set only 1 which is always the same..

thanks in advance for any help

I bought it from the Elektron website, but for sure there is some issues with these...

During the transfer of sample my mac get stuck 3 times, it is new and powerful...

The OT get stuck as well, I did the test and everything is ok..

Now i just think that I lost 90 euro !!
