## Multitrack live experiment 1.001

Posted by REOvolt - 2013/09/02 01:33

---

Experimental recording with multiple tracks where every track is played live in one take without any preparation. I did this experiment to test if it's possible to jam along my own recorded stems on the fly and still get a consistent track. The result is organic and rough. The question is, does this sound adventurous and exciting or does it need a lot of polishing to make it really interesting enough.
