
yamaha g-50 pitch-to-midi converter (made by Axon)

Posted by deltaphoenix - 2013/09/08 02:25

Works great, in nice but used condition. Branded Yamaha but actually built/designed by Axon. This unit kills any of the Roland pitch-to-midi converters.

\$200 shipped in CONUS, Paypal accepted

I can put up video of me using it with my bass.
