
Free - Blank Arturia MiniBrute preset sheets - home-brewed

Posted by shemp - 2013/09/09 07:39

I had a buddy print me out 90+ of these (not pre-cut, alas) on sturdy material that is very similar to the 'preset' sheets included with the MiniBrute.

Frankly, I've got waaay too many and would be willing to ship out what I've got left, at no cost to EU/Elektronaut users, except to cover postage.

The only catch is, it's first come first serve, and you've got to take at least 10 at a time.

email is best
