
Reverb send ? Not Mix

Posted by Human_Nature - 2013/09/10 04:37

Is there a way to send audio into the reverb and pull back on the fx send and still have the reverb ringing. I have tried all the verbs but they only seem to have a mix level not a send.

Which machine are you talking about? I'm guessing OT as you hint at a choice of reverbs.
On the OT use Vol not level. Vol is pre effect Level post.
Hope that helps
